O NAMA ABOUT US

Aquaestil plus osnovali smo sada već davne 1998. godine s jasnom vizijom da stvorimo stabilnog i inovativnog proizvođača kupaonske opreme prepoznatljivog po kvalitetnim proizvodima i tržišnom pristupu koji podrazumijeva osluškivanje želja i potreba svakog kupca.

We have founded Aquaestil plus company in 1998. with a clear vision to create a stable and innovative bathroom equipment manufacturer recognizable by quality products and market approach which implies listening to the wishes and needs of each customer.

Zahvaljujući energičnom tržišnom pristupu, stalnim ulaganjima u sve naprednija tehnološka rješenja u proizvodnji te suradnjom s renomiranim europskim imenima iz domene proizvodnje i prodaje kupaonske opreme, uspjeli smo u tek nekoliko godina pozicionirati ime Aquaestil kao sinonim za kvalitetna i moderna rješenja za kupaonice. U narednim godinama poduzeće se sustavno širi, implementirajući inovativna rješenja u svaki segment poslovanja, a sve s ciljem podizanja kvalitete krajnjih proizvoda i usluga.

Thanks to the energetic market approach, constant investments in more advanced technological solutions in production and cooperation with renowned European names from the domain of production and sales of bathroom equipment, we have succeeded in positioning the name Aquaestil as a synonym for quality and modern bathroom solutions. In the coming years, the company is systematically expanding, implementing innovative solutions in every business segment, all with the aim of raising the quality of end products and services.

Naš proizvodni program sastoji se od širokog asortimana akrilnih kupaonskih kada, hidromasažnih kada, tuš kada, staklenih tuš paravana, masažnih i parnih kabina, masažnih stupova, kupaonskog namještaja te proizvoda od kompozitnih materijala kao što su umivaonici proizvedeni tehnologijom sintetskog mramora SYMAN i modernog solid surface materijala ASTONE.

Our production program consists of a wide range of acrylic bathtubs, whirlpool bathtubs, shower trays, glass shower screens, massage and steam cabins, massage columns, bathroom furniture and composite material products such as sinks made from synthetic marble SYMAN and modern solid surface material ASTONE.

Aquaestil danas ima oko 500 zaposlenika raspoređenih u četiri proizvodne jedinice smještenih u Dugoj Resi, Ozlju, Generalskom Stolu i Našicama. Posebno smo ponosni na vlastiti odjel za istraživanje i razvoj koji je zadužen za dizajn i testiranje proizvoda prije njihovog plasmana na tržište. Zahvaljujući tome, uspijevamo pronaći idealno rješenje i za najsloženije kupaonske konfiguracije te vršimo pomnu kontrolu svih proizvoda na zadovoljstvo kupaca koji mogu u njima uživati dugi niz godina.

Aquaestil today has about 500 employees deployed in four production units located in Croatia. We are particularly proud of our own R&D department that is in charge of designing and testing products before placing them on the market. Thanks to this, we are able to find the ideal solution for the most complex bathroom configurations and to carefully control all our products to the satisfaction of the customers who can enjoy them for many years.

Pored iznimnih rezultata na hrvatskom tržištu, kao dokaz kvalitete i kontinuiranog rada, svakako je i činjenica što su Aquaestil proizvodi prepoznati i na zahtjevnom tržištu EU, na kojem se ostvaruje većina ukupnih prihoda poduzeća.

In addition to the outstanding results on the Croatian market, as a proof of quality and continuous development we are proud that Aquaestil products are recognized in a demanding EU market where most of the company's total revenues are realized.

Organizacija poduzeća vođena je primjenom certificiranog sustava kvalitete koje poduzeće posjeduje sukladno normi ISO 9001:2000, a odnosi se na područje proizvodnje i prodaje te održavanja cjelokupnog poslovnog i tehnološkog sustava. Svi Aquaestil proizvodi izrađeni su prema najvišim europskim standardima, a funkcionalnost, dopadljiv dizajn i vrhunska kvaliteta njihove su zajedničke karakteristike.

The organization of the company is led by the quality system certified in accordance with the ISO 9001:2000 standard, which refers to the area of production and the maintenance of a whole management and technology systems. All Aquaestil products are made in accordance with the highest European standards and functionality while neat design and top quality are their common characteristics.

Nadamo se kako ćete listajući ovaj katalog pronaći idealno rješenje za Vašu najdražu prostoriju - kupaonicu!

We hope that you will find the ideal solution for your favorite room while going through this catalogue - the bathroom!

20 godina strasti prema kupaonicama

KUPAONSKE KADE BATHTUBS

Aquaestil kupaonske kade izrađene su od 100% lijevanog sanitarnog akrila, materijala koji se danas smatra najpogodnijim za tu svrhu. Lijevani sanitarni akril izuzetno je ugodan na dodir, a odlikuje se postojanošću boje, visokom razinom tvrdoće, kemijskom otpornošću i prije svega, besprijevnim sjajem čak i nakon puno godina korištenja. Zahvaljujući svojoj molekularnoj strukturi, kupaonske kade Aquaestil su izuzetno glatke i imaju minimalnu mikroskopsku poroznost pa se mikroorganizmi ne zadržavaju na njihovoj površini što osigurava maksimalnu razinu higijene u Vašoj kupaonici. Sve naše kupaonske kade posebno su ojačane na ključnim mjestima čime se osigurava njihova izdržljivost i dugotrajnost. Većina modela dostupna je i u varijanti s oblogom te s širokom lepezom dodatne opreme kao što su masažni sustavi i ugradbene armature.

Aquaestil bathtubs are made of 100% casted sanitary acrylic, which is considered to be the most suitable material for this purpose. The casted sanitary acrylic is very pleasant to the touch and is characterized by color durability, hardness, chemical resistance and, above all, immaculate glow even after many years of use. Thanks to its molecular structure, Aquaestil bathtubs are extremely smooth and have minimal microscopic porosity, so microorganisms do not stay on their surface, which ensures the maximum level of hygiene in your bathroom. All our baths are specially strengthened in key locations to ensure their durability and longevity. Most models are also available in a variant with a panel and a wide range of accessories such as massage systems and built-in mixers.

AMALFI

Modena 180x80

Modena je atraktivna pravokutna kada koja spada u red noviteta među kupaonskim kadama. Naime, njen specifičan oblik omogućuje Vam da ju koristite kao tuš kadu i kao klasičnu ležeću kadu. Preporučamo Vam ugradnju paravana i masažnog sistema kako bi dobili uistinu multifunkcionalnu kadu.

Modena is an attractive rectangular bathtub; its specific shape allows you to use it for both showering and bathing. A shower screen and massage system can be added to get a truly multifunctional bathtub.

kade se isporučuju bez prelivno-otočne garniture (potrebno zasebno naručiti)
bathtubs are delivered without pop-up bath waste (to be ordered separately)

NAPOMENA: Radi lakšeg eventualnog servisa masažnog sustava preporučamo naružbu masažnih kada s oblogom. Ukoliko se kada s masažnim sustavom obriđava, svakako je potrebno ugraditi rešetku radi recirkulacije zraka.
NOTE: For the convenience of massage system maintenance, we recommend ordering bathtubs with a panel. If bathtub is installed by cladding, it is essential to install the grid for air recirculation.

TUŠ KADE SHOWER TRAYS

Aquaestil tuš kade izrađene su od 100% lijevanog sanitarnog akrila koji ih čini ugodnima na dodir te vrlo jednostavnima za čišćenje i održavanje. Protuklizna svojstva ovog materijala, kao i činjenica kako se patogene čestice manje zadržavaju na akrilnim tuš kadama zbog visoke razine neporoznosti, doprinose Vašem zdravlju i sigurnosti. Naša velika ponuda tuš kada sastoji se od više modela vrlo plitkih tuš kada namijenjih ugradnji u razinu poda, koje kada se kombiniraju s Aquaestil staklenim paravanima visine 200 cm, čine moderni “walk-in shower” koncept, te klasičnih modela tuš kada namijenjih obzidavanju ili ugradnji s pripadajućom oblogom.

Aquaestil shower trays are made of 100% casted sanitary acrylic, which makes them comfortable and very easy to clean and maintain. The anti-slip properties of this material as well as the fact that pathogenic particles retain less on acrylic surface due to high level of non porosity contribute to your health and safety. Our extensive assortment consists of several models of ultra-flat shower trays designed for floor-level installation which can be combined with Aquaestil 200 cm high shower screens, featuring a modern walk-in shower concept and classic shower tray models designed for cladding or fitting with a corresponding panel.

TUŠ KADE SHOWER TRAYS

Slope 90x90

Slope je vrlo plitka tuš kada namijenjena ugradnji u razinu poda. Izljev je izveden pomoću izdužene kromirane pedane, što ovu tuš kadu čini vrlo zanimljivom.

Slope is an ultra-flat shower tray intended for installation in the floor level. Elongated chrome outflow cover enhances this shower trays looks.

Tuš kada Shiny

TUŠ KADE OD LIJEVANOG MRAMORA MINERAL MARBLE SHOWER TRAYS

Lijevani ili umjetni mramor je napredni materijal koji se sastoji od prirodnih mineralnih i kamenih čestica, poliestera i smole koja služi kao sredstvo za vezivanje. Ovaj materijal je lijevan u posebno izrađenim kalupima, a svaka tuš kada prolazi detaljnu završnu obradu i tretman izrazito izdržljivim i otpornim Gelcoat® materijalom koji površinu čini besprijekorno sjajnom i otpornom na ogrebotine.

Tuš kade od lijevanog mramora odlikuju se maksimalnom čvrstoćom i savršenim linijama koje je moguće izvesti zahvaljujući naprednim svojstvima ovog materijala. Površina ovih tuš kada je sjajna i vrlo jednostavna za svakodnevno čišćenje i održavanje.

Mineral or artificial marble is an advanced material that is composed of natural mineral and stone particles, polyester and resin bonding agents. This material is casted in specially made moulds and every shower tray passes detailed finishing and is treated in a tough, hardwearing scratch resistant Gelcoat® with a perfect white glossy finish.

Mineral marble shower trays are characterized by maximum strength and perfect lines that can be achieved thanks to the advanced properties of this material. The surface of these shower trays is glossy and very easy to clean and maintain.

Tuš kada Mima

Shiny 90x90

PARAVANI ZA KADE BATH SCREENS

Aquaestil paravani za kade i tuš kade savršeni su spoj kvalitetnih materijala, vrhunske izrade i dizajna, a vrlo širok asortiman modela i opcija koje Vam nudimo garancija su kako ćete pronaći idealan izbor za svoju kupaonicu.

Većina Aquaestil paravana izrađena je od 6 mm kaljenog stakla koje je dovoljno lako za jednostavnu manipulaciju, ali i dovoljno čvrsto za najvišu razinu sigurnosti. Kod većine modela ponuđena je opcija prozirnog ili reljefnog, odnosno satiniranog stakla koje će osim onih funkcionalnih, zasigurno zadovoljiti i najviše estetske kriterije.

Profili osiguravaju čvrstu konstrukciju paravana i njihovo pričvršćivanje, a iznimna je pažnja posvećena njihovoj kvaliteti i dizajnu koji prati moderni koncept kupaonskog uređenja. Profili su kod većine paravana dostupni u bijeloj ili srebrnoj izvedbi. Specijalni nano premaz koji uspješno sprečava nakupljanje kamenca standardno se nanosi na većinu paravana koje je moguće izraditi i po mjeri kako bi se prilagodili specifičnim kupaonskim konfiguracijama.

Aquaestil screens for baths and shower trays are the perfect blend of quality materials, top workmanship and design. Our extensive range of models and options we offer are a guarantee that you will find the ideal choice for your bathroom.

Most Aquaestil screens are made of 6 mm thick glass that is easy enough for easy manipulation but also tough enough for the highest level of safety. Most models offer a choice of transparent or satin glass that, besides those functional, will surely satisfy even the highest aesthetic criteria.

The profiles provide a necessary firmness to the construction and allow safe installation, while exceptional attention is paid to their quality and design that follows the modern concept of bathroom decoration. Profiles of the most screens are available in white or silver finishing. A special nano coating that successfully blocks lime accumulation is standard for most screens which can also be custom-made to match specific bathroom configurations.

Titan I je univerzalni, jednokrilni stakleni tuš paravan za pravokutne kupaoanske kade. U izvedbi s prozirnim staklom nije potrebno unaprijed znati na koji će se zid montirati. No, ukoliko je staklo reljefno, potrebno je definirati poziciju ugradnje prilikom narudžbe radi pravilne orijentacije reljefa. Paravan je moguće u potpunosti preklopiti u oba smjera.

Titan I is a universal, single screen intended for rectangular bathtubs. When ordered with transparent glass it is not necessary to know in advance onto which wall it will be mounted. However, if textured glass is desired, orientation must be taken into consideration when placing the order. Screen can be fully turned in both directions.

Tehnički podaci str.191

NAPOMENE:
NOTES:

NANOS PROTIV KAMENCA

Sve tuš kabine i paravani označeni ovim znakom su tvornički, bez dodatne nadoknade obostrano tretirani nanosom protiv kamenca čime se dodatno olakšava svakodnevno čišćenje i održavanje.

Ovaj sofisticirani način zaštite staklenih površina zasniva se na primjeni nanotehnologije koja se sastoji se od nanošenja nanočestica s komponentama koje se čvrsto vežu na staklenu površinu i odbijaju druge komponente poput vode, različitih ulja, prljavštine, insekata i kamenca. Budući da se voda (samim time i kamenac), nečistoće i gljivice ne mogu čvrsto primiti na površinu, čišćenje je iznimno jednostavno.

Nanos protiv kamenca također štiti i od nepopravljive staklene korozije, a svoje djelovanje čestice na površini zadržavaju dulje vrijeme bez trošenja.

Radi dugotrajnog učinka premaza, tretiranu površinu nije poželjno čistiti sredstvima za čišćenje već je istu dovoljno samo prebrisati vlažnom (najbolje mikrofibra) krpom kako bi površina ponovo bila kristalno čista.

Prozirna stakla paravana su obostrano tretirana nanosom protiv kamenca, dok su reljefna i satinirana stakla tretirana sa unutarnje, glatke strane.

ANTI-LIMESCALE COATING

All shower enclosures and screens marked with this symbol are pre-treated on both sides with anti-limescale coating which significantly eases daily cleaning and maintenance.

This sophisticated method of glass surfaces protection is based on the application of nanotechnology. Nanoparticles are firmly attached to the glass surface and repel other components like water, oil, dirt, insects and limescale, making regular cleaning very easy.

Anti-limescale coating also effectively protects from irreversible glass corrosion, while nanoparticles retain their properties for longer period without wearing down.

For long-lasting effect of the anti-limescale coating, it is recommended to use only microfiber cloth and avoid using any kind of common chemical cleansers.

Transparent screens are treated with anti-limescale coating on both sides, while screens with relief and satinated glass are treated only on the inner, smoother side.

reljefno staklo textured glass

prozirno staklo transparent glass

Aquaestil screens for baths and shower trays are the perfect blend of quality materials, top workmanship and design. Our extensive range of models and options we offer are a guarantee that you will find the ideal choice for your bathroom.

Most Aquaestil screens are made of 6 mm thick glass that is easy enough for easy manipulation but also tough enough for the highest level of safety. Most models offer a choice of transparent or satin glass that, besides those functional, will surely satisfy even the highest aesthetic criteria.

The profiles provide a necessary firmness to the construction and allow safe installation, while exceptional attention is paid to their quality and design that follows the modern concept of bathroom decoration. Profiles of the most screens are available in white or silver finishing. A special nano coating that successfully blocks lime accumulation is standard for most screens which can also be custom-made to match specific bathroom configurations.

Zenith je moderna fiksna staklena stijena koja se postavlja paralelno sa zidom, a u kombinaciji sa jednom od plitkih Aquaestil tuš kada ili prostorom izvedenim od pločica, sačinjava moderni “walk-in” kupaonski koncept.

Zenith walk-in is a modern fixed glass wall that is placed parallel to the wall. It can be combined with one of Aquaestil's ultra-flat shower trays or just using tiles to create the elegant “walk-in” bathroom concept.

NANOS PROTIV KAMENCA
ANTI-SCALE LAYER

Zenith Wall s dodatnom fiksnom stijenom “+L” pruža dodatnu zaštitu od prskanja vode. Paravan je izrađen od 8 mm kaljenog stakla tretiranog premazom protiv kamenca. S donje strane je učvršćen elegantnim niskim profilom u srebrnoj boji, a s gornje zidnim fiksatorima kvadratnog presjeka. Dodatna stijena “+L” ne može stajati samostalno i naručuje se isključivo kao dodatak paravanu Zenith Wall.

Zenith Wall with additional fixed wall “+L” provides additional protection against water splash. This screen is made of 8 mm of tempered glass treated with anti-lime coating. On the underside is affixed to the elegant silver profile and secured with square fixators on the upper side. Additional wall “+L” can not stand alone and is ordered exclusively as a supplement to the Zenith Wall screen.

SOGNO
2D ZA NIŠU 2D FOR NICHE

Saturno II D+W je tuš paravan koji se sastoji od trodjelnih kliznih vrata i jedne fiksne stijene. Zbog širokih profila i velikog opsega podešavanja, paravan je izuzetno pogodan za ugradnju na tuš kade nestandardnih dimenzija. Po potrebi je moguće kombinirati i dvije stijene sa jednim vratima kada je tuš kada postavljena samo na jedan zid. Ručka je integrirana u završni profil s ugrađenom magnetnom brtvom. Ovaj paravan posebno je pogodan za tuš kade manjih dimenzija zbog veće raspoložive širine ulaza.

Saturno II D+W is a shower screen that consists of a three-part sliding door and a fixed glass wall. Due to its wide profiles and ability to be adjusted, this shower screen is particularly effective when used with shower trays that do not match standard dimensions. Saturno II D+W offers the possibility to be combined with two fixed glass walls and a door, if the shower tray is adjacent to only one wall. The handles are integrated in the outer profile which also have a magnetic seal. This shower screen is specially suitable for small shower trays thanks to the wider space it can provide in the entrance.

Laguna za Čikolu

Tehnički podaci str.204
Technical information p.

Dodaci za paravane Shower screen options

EKSTENZIJSKI PROFIL

Ekstenzijski profil je dodatak na zidni profil paravana i koristi se kada je širina prostora za tuširanje za do 2 cm (Oasis, Mars), odnosno 3 cm (Savana, Sogno) veća od ugradbenih mjera naznačenih za pojedinu standardnu dimenziju paravana. Na taj način se izbjegava narudžba paravana po mjeri.

PODNI BRTVENI ALUMINIJSKI PROFIL

Ovaj dodatak lijepi se na rub tuš kade ili poda od keramičkih pločica predviđenih kao prostor za tuširanje i osigurava bolje brtvljenje tuš kabina s okretnim i preklopnim vratima. Postavlja se na način da podna brtva na vratima u zatvorenom položaju nasjeda na podni aluminijski brtveni profil. Isporučuje se u dužini od 100 cm i po potrebi se skraćuje na širinu vrata.

EXTENSION PROFILE

Extension profile is an addition to the wall profile of the screen and is used when the width of the shower area is up to 2 cm (Oasis, Mars) or 3 cm (Savana, Sogno) greater than the installation dimensions indicated for a particular standard screen size. This eliminates the need of making shower screen by measure.

SEALING ALUMINIUM FLOOR ELEMENT

This accessory is applied to the edge of a shower tray or a ceramic tile floor used as a shower area and provides a better sealing for enclosures with swing or foldable doors. It is positioned in such a way that the door seals in the closed position aligns with the aluminum sealing profile. It is delivered in length of 100 cm and is shortened if necessary to the width of the door.particular standard screen size. This eliminates the need of making shower screen by measure.

NANOS PROTIV KAMENCA

Sve tuš kabine i paravani označeni ovim znakom su tvornički, bez dodatne nadoknade obostrano tretirani nanosom protiv kamenca čime se dodatno olakšava svakodnevno čišćenje i održavanje.

Ovaj sofisticirani način zaštite staklenih površina zasniva se na primjeni nanotehnologije koja se sastoji se od nanošenja nanočestica s komponentama koje se čvrsto vežu na staklenu površinu i odbijaju druge komponente poput vode, različitih ulja, prljavštine, insekata i kamenca. Budući da se voda (samim time i kamenac), nečistoće i gljivice ne mogu čvrsto primiti na površinu, čišćenje je iznimno jednostavno.

Nanos protiv kamenca također štiti i od nepopravljive staklene korozije, a svoje djelovanje čestice na površini zadržavaju dulje vrijeme bez trošenja.

Radi dugotrajnog učinka premaza, tretiranu površinu nije poželjno čistiti sredstvima za čišćenje već je istu dovoljno samo prebrisati vlažnom (najbolje mikrofibra) krpom kako bi površina ponovo bila kristalno čista.

Prozirna stakla paravana su obostrano tretirana nanosom protiv kamenca, dok su reljefna i satinirana stakla tretirana sa unutarnje, glatke strane.

ANTI-LIMESCALE COATING

All shower enclosures and screens marked with this symbol are pre-treated on both sides with anti-limescale coating which significantly eases daily cleaning and maintenance.

This sophisticated method of glass surfaces protection is based on the application of nanotechnology. Nanoparticles are firmly attached to the glass surface and repel other components like water, oil, dirt, insects and limescale, making regular cleaning very easy.

Anti-limescale coating also effectively protects from irreversible glass corrosion, while nanoparticles retain their properties for longer period without wearing down.

For long-lasting effect of the anti-limescale coating, it is recommended to use only microfiber cloth and avoid using any kind of common chemical cleansers.

Transparent screens are treated with anti - limescale coating on both sides, while screens with relief and satinated glass are treated only on the inner, smoother side.

Dimenzije Dimensions	80x80, 90x90 cm
Visina Height	190 cm, Laguna za Čikolu - 155 cm Laguna for Čikola

Ugradbene miješalice Built-in mixers

Na većinu kada moguće je po želji ugraditi i miješalicu. U ponudu smo uvrstili nekoliko modela miješalica kao i opciju za punjenje kade preko prelivno-otočne garniture. Ukoliko umjesto standardnog izljeva za kadu ugrađujete prelivno-otočnu garnituru sa samopunjenjem, možete ju po želji kombinirati s miješalicama Cristina i GO.

Most bathtubs can be equipped with a built-in mixer. We offer several models of mixers and an alternative fill-in option through overflow-outflow set that can be combined with Cristina and GO mixers.

Komplet Cristina (dvoručna)
Set Cristina (two-handed)

Komplet Go (jednoručna)
Set Go (one-handed)

Komplet Surf (jednoručna)
Set Surf (one-handed)

Komplet Tecno (jednoručna)
Set Tecno (one-handed)

Masažni stupovi Massage columns

Masažni stupovi su vrlo praktična nadopuna postojećoj kadi ili tuš kadi jer ne iziskuju izmjene na instalacijama, lako se montiraju te pružaju mogućnost dodatne relaksacije prilikom kupanja ili tuširanja.

Massage columns are a very practical addition to an existing bathtub or shower tray as they do not require alterations to existing installations. They are easy to install and offer additional relaxation during bathing or showering.

Preljevno-otočna garnitura sa samopunjenjem Overflow-outflow set for auto-filling

Ova garnitura odlična je zamjena za klasični izljev, a punjenje kade se vrši pomoću skrivenog otvora u razini preljeva. Regulacija protoka vode vrši se pomoću ugradbene miješalice.

This set is a great replacement for a standard outflow, as bathtub is filled through hidden opening in the overflow level. Water flow is regulated with a built-in mixer.

Follow Me (sifon) Follow Me (siphon)

Prilikom odlaganja tuš slušalice nakon tuširanja, neminovno se manja količina vode izlije po crijevu u prostor ispod kade. Sifon Follow Me sakuplja tu vodu, čime se osigurava potpuna suhoća prostora ispod tuš slušalice. Sifon Follow Me ugrađuje se na masažne kade samo po zahtjevu kupca, čime se nadomješta standardni sifon i nadoplaćuje razlika u cijeni. Ovaj sifon je također dostupan i kao zaseban proizvod kojega možete samostalno montirati prema priloženoj uputi.

When disposing shower head after using it, usually a smaller amount of water sprinkles in the space beneath the bathtub following the shower tube. Siphon Follow Me collects that residual water ensuring total dryness. Siphon Follow Me is mounted on massage bathtubs only by request, thus replacing the standard one while difference in price is supplemented. This siphon is also available as a separate product which can be installed according to the appended installation manual.

PRIBOR ZA KADE I TUŠ KADE ADDITIONAL EQUIPMENT

Obloge za kade i tuš kade
Panels for bathtubs and shower trays

Obloge služe za elegantno zatvaranje kupaonskih kada ili tuš kada s jedne, dvije ili tri strane. Proizvodi se mogu naručiti s tvornički montiranom oblogom i postoljem (nogicama) ili kao zasebni elementi za naknadnu montažu. Postavljanje obloge posebno se preporuča kod masažnih kada jer je u tom slučaju olakšano njihovo održavanje i servis.

The panels are used to elegantly close the bathtub or shower tray from one, two or three sides. Products can be ordered with a factory-fitted panel and pedestal (legs) or as separate elements for later mounting. Panels are especially recommended for bathtubs with massage systems because due to easier access in case of maintenance.

Kutne letvice za kade i tuš kade
Corner profiles for bathtubs and shower trays

Kutne letvice su završni elementi koji se postavljaju na spoju kade sa zidom nakon montaže kade. Upotrebom kutnih letvica osigurava se nepropusnost na spoju kade sa zidom, pokrivaju se neravnine i ostali nedostaci kao posljedice ugradnje kade, čime se izbjegava pretjerano silikoniranje i zadržavanje nečistoća. S obzirom da su letvice presvučene akrilom osigurava se i trajna estetska vrijednost kade (neće s vremenom požutjeti). Kutne letvice prodaju se kao dva zasebna seta:

- Za kade:

 - letvice duljine 195 cm (x2)
 - kutnici (x2)
 - završni elementi (x2)
- Za tuš kade:

 - letvice duljine 95 cm (x2)
 - kutnik (x1)
 - završni elementi (x2)

Corner profiles are finishing elements placed in the junction between wall and bathtub. They ensure the tightness of the joint and also cover any imperfections occurred during installation. They also help to avoid using silicone in excess and the accumulation of dirtiness. Since profiles are coated in acrylic, their durability and appearance are guaranteed (they will not turn yellow over time). Corner profiles are available in two sets:

- For bathtubs:

 - 195 cm corner profiles (x2)
 - corner elements (x2)
 - endings (x2)
- For shower trays:

 - 95 cm corner profiles (x2)
 - corner element (x1)
 - endings (x2)

Podnožje za kade
Bathtub pedestal

Koristi se u slučaju kada, osim nivelacije kade, trebamo montirati i oblogu. Ugradnjom podnožja postiže se dodatna čvrstoća i stabilnost kade. Kao i kod nogica, podnožje se odabire ovisno o tipu kade. Detaljna uputa za montažu priložena je uz svaki komplet, a jednostavnost montaže omogućuje postavljanje i bez pomoći stručne osobe.

Pedestal is used when a panel will be installed. Besides helping to level the bathtub, it also provides additional strength and stability to the whole installation. Like with bathtub legs, this pedestal is used depending on the bathtub model. Detailed installation instructions are included in every kit.

Nogice za kade
Bathtub legs

Koriste se za nivelaciju kupaonske kade prilikom obzidavanja ili montaže obloge (u kombinaciji sa setom za montažu obloge).

U kompletu se nalaze i montažni zidni profili čijom se primjenom postiže dodatna stabilnost i krajnje pozicioniranje kade. Ovisno o obliku i veličini kade postoji više vrsta nogica, pa je prilikom narudžbe potrebno odabrati model koji odgovara tipu kade. Detaljna uputa za montažu priložena je uz svaki komplet.

Bathtub legs are used to level and support the bathtub when it is being built-in or when a panel is being installed (in combination with the panel installation kit). Prefabricated wall fittings are also included to ensure the stability of the bathtub and its accurate installation.

Bathtub legs vary depending on the shape and size of the bathtub, therefore it is important to choose the right legs for the bathtub of your choice. Detailed installation instructions are included in every kit.

Set za montažu obloge
Panel installation kit

Koristi se kod montaže obloge u kombinaciji s nogicama. Detaljna uputa za montažu priložena je uz svaki komplet.

This kit is used when installing a panel. It is used in combination with the bathtub legs. Detailed installation instructions are included.

Preljevno - otočna garnitura
Overflow - outflow system

Preljevno - otočna garnitura ne isporučuje se zajedno sa kadom, već je istu potrebno naručiti zasebno. Garnitura služi za ispravno i potpuno otjecanje vode iz kade. Potrebno je provjeriti potrebnu duljinu preljevno - otočne garniture za svaki pojedini model kupaonske kade. Dostupne duljine preljevno - otočne garniture: 50, 70, 100 cm.

Outflow - overflow system is not supplied standardly with Aquaestil baths. It has to be ordered as a separate item. Please check necessary length of the system for each bathtub model. Available lengths of overflow - overflow system: 50, 70, 100 cm.

Rešetka za uzidanu masažnu kadu
Metal grid for built-in whirlpool bathtubs

Kako bi se osigurala recirkulacija zraka kod masažne kade koja se uzidava bez obloge, potrebno je ugraditi rešetku. Preporučena minimalna dimenzija je 45x35 cm.

To ensure proper air circulation on massage bathtubs that are built-in without a panel, it is necessary to install this grid. Minimal recommended dimension is 45x35 cm.

Nogice za tuš kadu - peterodijelne
Shower tray frames - 5 parts

Koriste se za nivelaciju tuš kade prilikom obzidavanja ili montaže obloge. Ukoliko naručite tuš kadu s oblogom, ista će biti isporučena sa već montiranim nogicama i oblogom.

Shower tray frames are used to level and support shower trays when built-in or installed with a panel. When ordering a shower tray with panel, it will be delivered with its pre-assembled frame and panel.

ODRŽAVANJE I SERVIS MAINTENANCE & SERVICE

Kupaonske kade i tuš kade Bathtubs and shower trays

Aquaestil kupaonske kade i tuš kade izrađuju se od 100 % lijevanog sanitarnog akrila koji se odlikuje izuzetnim karakteristikama u cijeloj svojoj strukturi pa je površinsku glatkoću i sjaj moguće vratiti u prvobitno stanje čak i nakon manjih mehaničkih oštećenja.

Za razliku od kada izrađenih od akrila ABS ili poliestera, kod lijevanog sanitarnog akrila nema ograničenja vezanih uz saniranje oštećenog površinskog sloja jer sva svojstva materijala unutar strukture ostaju nepromijenjena. Kade izrađene od sanitarnog akrila odlikuju se optimalnom toplinskom i zvučnom izolacijom, te glatkom i sjajnom površinom ugodnom na dodir koja se izuzetno jednostavno održava.

Za čišćenje koristite krpu ili glatku spužvu i bilo koji tekući deterdžent. Pritom treba izbjegavati abrazivna sredstva koja sadrže zrnca jer bi se njima mogla ogrepsiti površina kade.

Za uklanjanje kamenca preporuča se spužvica namočena u ocat ili sredstva na bazi octa. Nakon čišćenja kadu je potrebno obrisati suhom krpom.

Ukoliko je kada izgubila prvobitan sjaj, ispolirajte ju pastom za poliranje koju ste nanijeli na komadić vate ili krpicu. Redovno održavanje preporuča se provoditi sredstvom za čišćenje i održavanje akrilnih i staklenih površina AQUACLEAN akril + staklo koje će Vašoj kadi omogućiti postojanost sjaja i potpune čistoće.

Ako je pak došlo do manjih površinskih oštećenja (ogrebotina), moguće ih je sanirati vodobrusnim papirom granulacije 240 do 800 i nakon toga ispolirati pastom. Kod većih oštećenja, koja se ne daju sanirati brušenjem i poliranjem, obratite se našem servisu koji će Vam sugerirati moguće načine sanacije.

Aquaestil bathtubs and shower trays are made of 100% sanitary cast acrylic which has numerous advantages over other sanitary materials such as ABS and polyester. Its homogenous structure allows surface smoothness and shine to be restored to its original condition even after minor mechanical damages.

Unlike bathtubs made from ABS or polyester, with sanitary cast acrylic there are no restrictions regarding refurbishment of the surface layer because all properties of the material within its structure remain unaltered. Bathtubs made of sanitary cast acrylic are characterized by optimum thermal and acoustic insulation and smooth shiny surfaces which are very easy to maintain.

For daily cleaning, use a fabric or sponge and smooth liquid detergent. Avoid using abrasive mediums that contain particles in order to prevent the surface from damaging and losing its shine.

To remove lime scale without damaging the bathtub, use a sponge soaked in vinegar or vinegar based products. After cleaning, wipe with a dry fabric.

If original shine is lost, use a polishing paste and polish it until the initial look is restored. Regular cleaning is recommended to maintain the product in optimum conditions. AQUA CLEAN acrylic + glass guarantees you maximum glossiness and cleanness.

If the bathtub has suffered minor damage such as scratches, they can be repaired with sandpaper of granulation 240-800 and a polishing paste. If damage cannot be repaired, contact our customer service department that will suggest you alternative methods for solving the problem.

Paravani za kade i tuš kade Shower screens

Većina modela paravana s prozirnim staklom tvornički je tretirana nanosom protiv kamenca koji uvelike olakšava njihovo svakodnevno čišćenje i održavanje. Ova tehnologija sastoji se u nanošenju nanočestica s komponentama koje se čvrsto vežu na staklenu površinu i odbijaju druge komponente poput vode, različitih ulja, prljavštine, insekata i ostataka kamenca. Također štite od nepopravljive staklene korozije.

Nakon tretmana, staklo je postojano na trenje, a svoje djelovanje čestice na površini zadržavaju dulje vrijeme bez potrebe za ponovnim tretmanom.

Profili paravana su izrađeni od aluminijske, eloksirani u srebrnu boju ili presvučeni zapečenom bijelom bojom u prahu. Eloksiranje ili anodna oksidacija je proces površinske zaštite specifičan za aluminij. Ovim procesom aluminij dobiva karakterističnu metaliziranu boju i trajnu zaštitu od korozije što je izuzetno važno u vlažnim uvjetima kao što je kupaoonica. S obzirom na visoku kvalitetu samog materijala, smanjena je potreba za održavanjem te se ono svodi na redovitu upotrebu klasičnih kemijski neabrazivnih sredstava za čišćenje metalnih i staklenih dijelova u kupaonici. Preporučujemo upotrebu sredstva za čišćenje Aquaclean acryl+glass.

Most shower screens are pre-treated with a special anti-scale layer. This technology consists of the application of nano particles onto the glass surface in order to repel other particles that tend to stick; such as oil, dirt, insects and lime scale. It also protects against irreparable glass corrosion.

After treatment, glass is much more resistant to friction and it is preserved for a longer period of time.

Profiles of the shower screens are made of aluminum, anodized in silver color or coated in white color. Anodizing is a specific process to protect aluminum. It ensures its shiny silver color and protects it against corrosion, which is extremely important in moist spaces such as bathrooms. Due to the quality materials and processes implemented in the shower screen production, maintenance is reduced to use of a regular conventional nonabrasive chemical for cleaning the metal parts.

Masažni sistemi Massage systems

Pored redovitog održavanja akrilnih površina potrebno je redovito održavati i masažne sisteme. S obzirom kako se radi o čitavom nizu različitih vrsta mlaznica i cijevi kojima se provodi voda, neadekvatnim i neredovitim održavanjem u sistemu se nakuplja prljavština te stvara idealno tlo za razvoj bakterija i mikroorganizama. Savjetujemo Vam da redovito nakon nekoliko kupanja, odnosno masiranja za čišćenje upotrijebite sredstvo za dezinfekciju.

Kod sustava koji nemaju poseban spremnik za automatsko provođenje dezinfekcije, sredstvo ulijte u vodu te pustite da procirkulira sistemom. Kod masažnih sistema sa ugrađenim spremnikom koji imaju mogućnost automatskog provođenja dezinfekcije, sredstvo ulijte u predviđeni spremnik i uključite sistem za dezinfekciju. U tu svrhu preporučamo Vam originalno Aquaestil sredstvo za dezinfekciju.

Regular maintenance of massage systems is very important. Since they are complex by nature; with many pipes and nozzles to carry the water, inadequate and irregular maintenance can cause accumulation of dirt and create fertile ground for bacteria and microorganisms. We advise you to regularly use some disinfection detergent.

For systems that do not have an automatic disinfection programme, simply pour the cleaning detergent in the water and let it circulate few times. With built-in massage systems in which automatic disinfection can be implemented, just pour in the detergent into the containers and turn on disinfection. For this purpose, we recommend original Aquaestil disinfection detergent.

AQUACLEAN SREDSTVO ZA ČIŠĆENJE AQUACLEAN CLEANSER

AQUACLEAN Quando akril + staklo namijenjen je čišćenju i održavanju akrilnih kupaonskih kada, tuš kada, masažnih i parnih tuš kabina, staklenih paravana i druge akrilne i staklene opreme.

AQUACLEAN Quando Sredstvo za aktivnu zaštitu i održavanje kupaonskog namještaja vrlo je učinkovito i na ostalim drvenim površinama koja se žele zaštititi i na kojima se želi povratiti prvotni sjaj.

AQUACLEAN Quando acrylic + glass is intended for cleaning and maintaining acrylic bathtubs, shower trays, massage and steam shower systems, glass shower screens and other acrylic and glass equipment.

AQUACLEAN Quando. Agent for active protection and maintenance of bathroom furniture. It is also very effective on any other wooden surfaces as it protects and restores the original look.

PRODAJNA MREŽA SALES NETWORK

Naše proizvode možete kupiti putem ovlaštenih Aquaestil distributera, a ažurirani popis istih pogledajte na www.aquaestil.hr. Osoblje naših distributera pohađa redovite edukacije o našim proizvodima pa možete biti sigurni kako ćete dobiti prave informacije neovisno o Vašoj lokaciji.

Our products are available through authorized Aquaestil distributors and updated list is available on www.aquaestil.hr. The staff of our distributors attend regular training on our products so you can be sure that you get the right information regardless of your location.

SERVIS SERVICE

Od početka našeg rada, veliku pažnju pridajemo komunikaciji s kupcima i dodanoj vrijednosti koju im pružamo putem kvalitetne usluge servisa. Zahvaljujući širokoj i pouzdanoj servisnoj mreži možete biti sigurni kako ćete dobiti kvalitetnu podršku i rezervne dijelove čak i nakon isteka garantnog roka, neovisno o Vašoj lokaciji i mjestu gdje ste kupili Aquaestil proizvode.

Since the beginning of our work, great attention is given to communication with customers and the added value provided through the quality service. Thanks to a broad and reliable service network you can be sure that you will get quality support and spare parts even after the warranty period, regardless of your location and the place where you bought Aquaestil products.

NANOS PROTIV KAMENCA - SET ANTI-LIMESCALE SET

Većina Aquaestil paravana tvornički je tretirana nanosom protiv kamenca, ali kao dodatnu mogućnost nudimo Vam zasebni set AQUACLEAN – zaštitni nano premaz za staklo i keramiku. Pomoću ovog seta možete ponoviti tretman na staklenim paravanima ili od nečistoće i kamenca zaštititi ostale staklene i keramičke površine u Vašem domu.

Set se sastoji od:
- Nano čistača (200 ml)
- Nano zaštitnog premaza (2 x 28 ml)
- Mikrofibra krpe

Most Aquaestil shower screens are treated against limescale. However, we also offer the AQUACLEAN set as a separate item; which provides a protective nano coating to glass and ceramics. With this set, you may reapply the anti-scale layer when necessary and also protect other glass or ceramic surfaces in your home.

Set consists of:
- Nano cleanser (200 ml)
- Nano protective coating (2 x 28 ml)
- Microfiber cloth

IZJAVA O ODRICANJU OD ODGOVORNOSTI

Aquaestil plus d.o.o. poduzima sve napore kako bi podaci u ovom katalogu bili točni i kvalitetni. Ipak, Aquaestil plus d.o.o. ne garantira niti može snositi pravne posljedice za točnost i potpunost prikazanih informacija te zadržava pravo izmjene proizvoda i njihovih karakteristika. Pri ugradnji naših proizvoda potrebno je zatražiti pomoć profesionalaca jer se način ugradnje može razlikovati ovisno o okolnostima.

Tvrtka posebnu pozornost posvećuje kvaliteti izrade proizvoda, no njihova konačna funkcionalnost ovisi o načinu montaže i pripremi prostora za montažu. Savjetujemo da se naši proizvodi postavljaju isključivo od strane stručnih osoba. Jamstveni rok svakog pojedinog proizvoda naznačen je na jamstvenom listu priloženom uz proizvode, a jamstvo vrijedi isključivo ukoliko je proizvod montiran prema priloženim uputama. Aquaestil plus d.o.o. ne preuzima odgovornost za štete na proizvodima ili objektima prouzročene zbog nestručnog rukovanja ili montaže. Kod paravana koji na svim stranama nemaju montirane profile nije moguće postići potpunu funkcionalnost, odnosno, potpuno brtvljenje kod takovih proizvoda nije zajamčeno te se istjecanje vode u manjoj mjeri iz prostora za tuširanje ne može smatrati posljedicom proizvoda s greškom.

Aquaestil plus d.o.o. vlasnik je cijelog sadržaja prikazanog u ovom katalogu.

U slučaju dodatnih pitanja ili komentara molimo vas da nas kontaktirate.

DISCLAIMER

Aquaestil plus d.o.o. makes every effort to maintain the accuracy and quality of the information provided in this catalogue. However, Aquaestil plus d.o.o. cannot guarantee and assumes no legal liability or responsibility for the accuracy or completeness of the information provided and retains the right to change products and their characteristics. You should take appropriate professional advice because the application of our equipment may vary depending on particular circumstances.

The company pays special attention to the quality of product design, but their ultimate functionality depends on the way of assembly and preparation of the mounting space. We advise that our products are installed exclusively by professionals. The warranty period for each individual product is indicated on the guarantee sheet provided with the products and the warranty is valid only if instructions indicated on the warranty sheet are respected. Aquaestil plus d.o.o. does not assume liability for damage to products or objects caused by improper handling or installation. In the case of shower screens that do not have profiles on all sides, it is not possible to achieve full functionality, that is, complete sealing with such products is not guaranteed and minor drainage from the showering area can not be considered as a consequence of the defective product.

The copyright of all content on this catalogue is owned by Aquaestil plus d.o.o.

In case of any questions or remarks, feel free to contact us.
