KALKSTONE COLLECTION

STONE EFFECT

Kalkstone

consistency

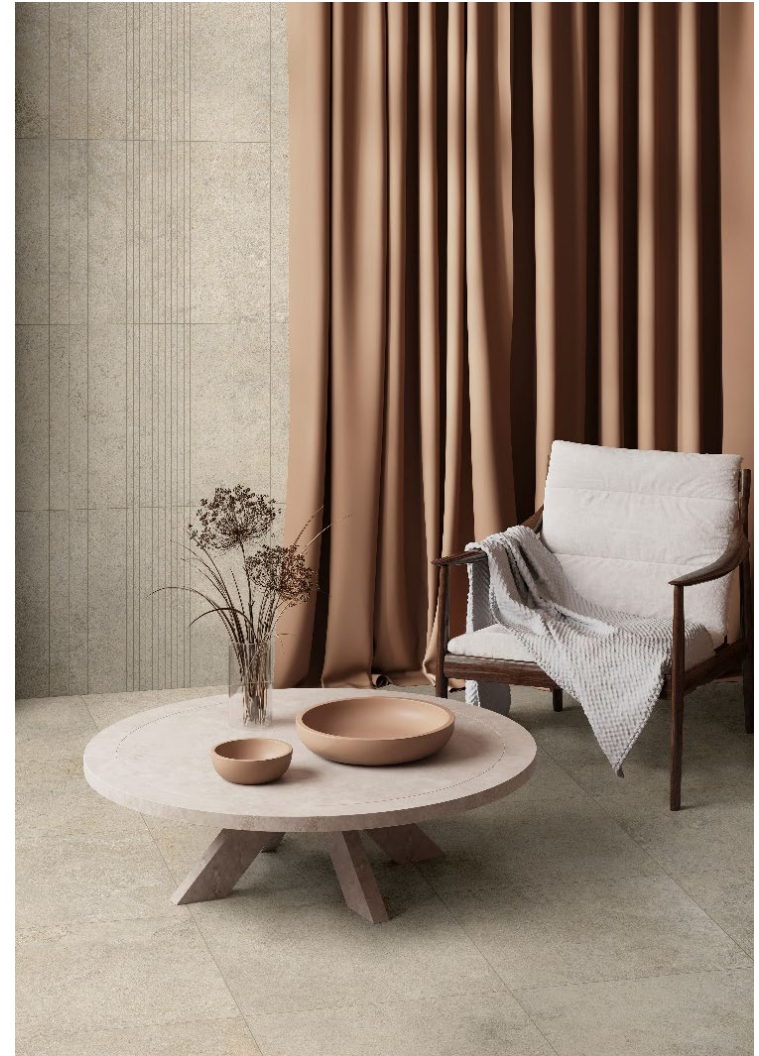

The design scope of the timeless, solid beauty of the stone look is now extended by the Kalkstone collection, the Ragno brand's first to be produced with the 3D Ink technology, which ensures that the surface patterning and structure of every piece correspond perfectly, for an extremely natural look.

This new porcelain stoneware floor covering range creates warm, welcoming interiors and timeless design schemes immune to time, fashions and trends.

The wide assortment of sizes - 120x120, 60x120, 60x60, 30x60 and 30x30 - is produced with the innovative 3D Ink technology in 4 colors, White, Sand, Natural & Grey, suitable for both traditional, rustic settings and more modern, contemporary locations.

The 20x20 and 20x40 sizes are also available with outdoor structured surface in all colors, manufactured with the conventional technology.

This collection's extreme versatility enables combinations with many other Ragno brand floor and wall tiles and a wide array of residential and commercial uses.
